

Inputs Attestation for organic farming

With the Inputs Attestation service, **ECOCERT takes the Inputs Documentary Review one step further** and enables enhanced reliability and traceability issuing a formal statement on the compliance of your products with the requirements of the European Council Regulation 834/2007 and the National Organic Program (NOP – USA) and the Japanese Agricultural Standard (JAS - Japan).

Why choose Ecocert?

For real added value, ECOCERT has implemented an in-depth auditing process including an **onsite inspection of all manufacturing** facilities and a full documentary review:

- > The “**ECOCERT Inputs**” logo on your product packaging and commercial documents attested.
- > A “**commercial attestation**” on the compliance of your products.
- > **Product labels** bearing the following references:
 - “Inspected by ECOCERT SA F-32600”
 - “NOP compliant product”
 - “Suitable for organic farming in compliance with Regulation (EC) 834/2007”
 - “JAS compliant product”
- > Your products are listed on our website (www.inputs.bio) as approved for use in organic farming.
